Life/form® Infant IV Arm

(ECLF03637U)

This easy-to-use practice arm allows for realistic training in infant venipuncture and IV insertion at common sites along the arm and hand.

General Overview

This convenient practice arm simulates an infant's more delicate skin and veins for realistic practice of venipuncture and injection techniques. Veins may be accessed through multiple points, and the trainer may be punctured repeatedly. Skin and veins can be replaced to extend the life of the training arm.

Key Features and Benefits

Life/form® Infant IV Arm features:

- Realistic, injectable cephalic vein, basilic vein, and dorsal venous arch that can be palpated
- Extremely thin synthetic skin
- Rubber vein tubing with a small lumen and thin walls
- Simulated blood
- Realistic flashback
- Training capabilities in:
 - venipuncture
 - starting IVs

Life/form® Infant IV Arm benefits:

- Helps avoid patient injury and liability while students are learning new procedures
- Trainer lets students identify the proper injection area and get the feel of giving a real injection to an infant patient
- Multiple vein locations let students practice venipuncture at common sites in the arm and hand
- Replaceable skin and veins extend the life of the training arm and are easy to use

Comes with:

- Practice arm
- 3 cc syringe
- 22 gauge needle
- Butterfly needle
- Pint of simulated blood
- 2 IV bags
- 2 towels
- Instructions for use
- 5-year manufacturer's warranty

Dimensions and Specifications

- Shipping dimensions: 8" x 5" x 5"
- Shipping weight: 2.5 lb
